INDUSTRY · DEFENCE AND SECURITY

A Canadian partner for defence prime contractors.

Software development and systems integration in classified and federal environments, subcontracted or engaged directly.

Since 2012, Logisphère has designed and integrated digital systems for Canadian defence and federal programs, subcontracted under large integrators or engaged directly for its clients. Our cleared, bilingual teams operate inside secured IT environments, including prime contractor corporate networks, ECN, DRENET and DWAN.

THE STABILITY BEHIND THE TEAM

14
years in defence and federal, since 2012

74
eNPS, our employee recommendation score

technological freedom

WHAT WE DELIVER

SECURE DEVELOPMENT
Custom software and systems integration in defence and federal environments.

EMBEDDED TEAMS
Cleared, defence-experienced people: solution architecture, analysis, development.

AGNOSTIC ADVISORY
Build-vs-buy decisions and modernization, with no licence to sell you.

AGILE DELIVERY
From a single specialist to a full project team, aligned with mission priorities.

ENGAGEMENT MODELS

EMBEDDED SPECIALIST
A single cleared expert, grafted onto your team to fill a specific need.

PROJECT TEAM
A full team, from architecture to deployment, run to your mission priorities.

PROGRAM SUPPORT
Long-term in-service support and evolution, aligned with the program lifecycle.

NATO · FIVE EYES

Proven interoperability across NATO and Five Eyes partners, validated in multinational exercises.

VERIFIABLE CLEARANCES

- Controlled goods program
- Document safeguarding capability
- Organization security clearance
- NATO-registered supplier

ITB-READY

- **100% Canadian**: ownership, operations, workforce
- **Canadian talent**: development and retention of engineers
- **Key Industrial Capabilities**: AI, cyber resilience, systems integration
- **Lasting support**: long-term in-service support

— INDUSTRY · DEFENCE AND SECURITY

Proven capabilities.
Ready for your program.

Proof through examples: already at work under mandates for major defence integrators.

Securing the Canadian Army's land command system.

CONTEXT
Multi-year program for a **major defence integrator**: secure access across NATO and Five Eyes.

OUR WORK
SSO/2FA (Kerberos, AD), **identity federation** (ADFS/SAML) and RBAC, supporting the lead architect.

OUTCOME
Validated in a NATO interoperability exercise: secure data sharing with allies.

AI for vulnerability assessment.

CONTEXT
AI for cybersecurity, to automate and accelerate **vulnerability assessment and penetration testing**.

OUR WORK
AI engines (ML, NLP, LLMs) for risk assessment; intrusion detection aligned with **MITRE ATT&CK**.

OUTCOME
In production: **less manual risk-data analysis** and broader threat detection coverage.

TAK integration for land electronic warfare.

CONTEXT
Army EW modernization (**CFLEWM**): systems must share a common operating picture via TAK.

OUR WORK
Demonstrator: real **Cursor on Target** messages to an open-source TAK server, Python, Docker.

OUTCOME
Runs offline in one command, live on **unmodified ATAK**: EW and C-IED data in the allied picture.

WHY AN SMB PARTNER

- Direct access to senior architects, not a junior team in training.
- Fast scale-up, without a long procurement cycle.
- No added management layer between your program and execution.
- Lean structure: we adjust to your priorities, not the other way around.

FREQUENTLY ASKED QUESTIONS

HOW FAST CAN YOUR TEAM ONBOARD?
Our clearances are already in place, which allows onboarding in weeks, not quarters, once the mandate is confirmed.

DO YOU DELIVER IN BOTH FRENCH AND ENGLISH?
Yes, our teams deliver in both official languages, with no handoff or added translation step.

DO YOU WORK INSIDE OUR ENVIRONMENTS?
Yes. Our teams operate inside your secured IT environments, including ECN, DRENET and DWAN.

WHAT SCALE OF TEAM CAN YOU PROVIDE?
From a single embedded specialist to a full project team, sized to your mission priorities.

A bid in progress? Let's talk before the deadline.
